Description

The Bulletin 1492 Residual Current Devices are available in 2- or 4-pole construction with four sensitivity settings to detect earth leakage to IEC standards. Bulletin 1492-RCDs are designed to provide a degree of safety in the sensing of earth leakage that can be hazardous to personnel or machinery. Both line and load terminals accept 1.5 ... 35 mm² copper wire.

It is recommended that the devices be tested monthly by using the "TEST" button to check for proper operation of the device.
