

This high quality range of Switchboard instruments complies with the American specification ANSI-C39.1 (1981) accuracy class 1.

Available in two case sizes, their rugged design characteristics suit the most demanding of environmental applications.

Approvals

- **UL Approved**
File No: E87815
- **CSA Approved**
File No: LR99712-1
- **ABS American Bureau of Shipping approved**
- **ISSEP Institute Scientifique de Service Public approved**

Description

Two case sizes, 4 1/2" (075, 077 & 078) and 9" (079) - 4 1/2" (078) is high shock hermetically sealed, all models have heavy gauge pressed steel cases. Mounting is by four integral studs. Standard fronts for Models 075 & 077 are a one piece flame retardant polycarbonate moulding with a matt black finished bezel area, and a specially contoured window to minimise reflection from adjacent light sources. Model 079 has a black pressed steel bezel with a toughened glass window. Model 078 has a die-cast

bezel and a projecting moulded toughened glass window, which incorporates a gas tight zero adjuster.

Options include

Supplementary red pointer (075 & 077), slave pointer, calibration for non standard ambient temperatures, special scales, trim potentiometers, etc are optional extras. Illuminated black or white dials with white or red light sources are also available as options.

Features

- Rugged Hi-Q taut-band suspension
- Accuracy class 1
- Scales are 240° moving iron and 250° moving coil
- Response time is approximately 2.5 seconds to full scale (077 and 078) and 3.5 seconds (079)
- Overshoot is 33% maximum
- Bump, Shock and vibration proof
- Meets all the requirements of ANSI-C39.1 (1981)
- Models 075/077/079 to IP54(NEMA 3S) splash proof
- IP55 (NEMA 4) hoseproof is an optional extra
- Model 078 to IP67 (NEMA 6 & 6P)
- Parallax error-free platform dials
- BASEEFA intrinsically safe options certification code Ex ia 11c T4
- Operating temperature range 0°C to +40°C, -40°C to +70°C (078)
- Storage temperature -10°C to +50°C
- Extreme temperature range -20°C to +65°C
- Dielectric withstand: 2.3kV for 1 minute
- Calibrated at 23°C
- Non reflecting window (075/077/079)
- JIS dimensioned product available on request

Dimensions

Model	Panel Cut-out			Rear View C	D	E	F	G
	Dia	A	B					
075	103	86	43	110	17	-	30	101
077	103	86	43	110	17	-	30	101
078	103	86	43	110	17	-	30	101
079	229	86	43	229	17	-	30	101

- 1 4 Fixing holes Ø 8mm.
- 2 1/4-28 UNF fixing studs.
- 3 10-32 UNF Terminals (M5 screw clamp terminal on model 075).

Dimension E varies with measured parameter - see selection table on page 29.

070 Series ANSI Switchboard Meters

A.C. & D.C. Ammeters, Voltmeters and Frequency Meters

Features

- UL/CSA approvals
- 250° Linear scale
- AC instruments with true RMS converting circuit
- JIS dimensioned product available on request
- Oil dampened mechanisms for superior performance in high vibration situations

Self contained HI-Q Taut Band moving coil
RMS compensated rectifier

Specification

Manufactured in accordance with American National Standards ANSI C39.1, 1981

Accuracy:	±1% full scale at 23°C (73°F)	Storage Temperature:	-10 to +50°C (14 to 122°F)
Scale Arc:	250° full scale deflection	Extreme Temperature Range:	-20° to +65°C (-4° to +149°F)
Scale Length:		Terminals:	Standard 10-32 UNF stud optional M5 screw clamp
077 & 078:	175.2 mm (6.9")	Position of use:	Vertical (scale)
079:	353 mm (13.9")	Dielectric withstand:	2300V A.C. for 1 minute between electrical circuit and case
Scale Plate:	2 piece, platform type	Overshoot:	33% maximum
Response Time:		Enclosure code:	
077 & 078:	Approximately 2.5 seconds to full scale	077 & 079:	IP54, optional IP55
079:	Approximately 3.5 seconds to full scale	078:	IP67
Operating Temperature Range:	0 to 40°C (32 to 104°F)		

Peak Transient Suppression

Some types of frequency meters can be damaged by transient supply voltage spikes. Crompton 077-41 frequency meters can withstand, without damage, 10 successive applications of transient spikes of 1250 volts (duration of transient 30 milliseconds, decaying to 1150 volts for 1 millisecond; 5 minutes interval between successive applications.

Ammeters and Voltmeters

Overload Rating:	A.C. Ammeters - 2 x continuous, 50 x for 1 second A.C. Voltmeters and frequency meters - 1.2 x continuous D.C. Ammeters - 2 x continuous 10 x for 1 second D.C. Voltmeters - 1.2 x continuous
Frequency Range:	A.C. calibration 60Hz ±20%

Frequency Meters

Center Scale Hz	Maximum Frequency Hz	Error In Hz	Response Time:	3 seconds maximum
45-55	50	0.15	External Temperature Influence:	0.6 times accuracy maximum with ±10°C from reference temperature
46-54	50	0.15	External field influence:	2.0 times accuracy maximum with 0.5mT field
45-65	55	0.25	Acceptable input Harmonic Content:	Up to 30% distortion
50-70	60	0.25		
55-65	60	0.15		
56-64	60	0.15		
58-62	60	0.08		
350-450	400	1.30		
360-440	400	1.25		
380-420	400	0.80
