These Simplex 62.5/125um Multimode Fiber Optic Patchcords are terminated with ST fiber optic connectors on both ends. The fiber optic connectors have durable and reliable polished ceramic ferrules, not composite ferrules often used in low-cost fiber optic cable assemblies. The fiber optic connector ferrules have a precision machine polish that ensures consistent, reliable performance. Maximum loss is 0.4dB and back reflection is -25dB. This product is guaranteed to meet or exceed fiber optic industry standards.

In addition to this fiber optic patchcord style, we stock many other fiber optic patchcords for a wide range of applications. You can order fiber optic patchcords terminated with any combination of ST, SC, FC, LC, MT-RJ and VF-45 fiber optic connectors. We can provide custom fiber optic cable assemblies in various lengths, pre-terminated with fiber optic connectors of your choice.

We also offer related products and accessories including fiber optic cleaning supplies, inspection microscopes, cable management systems and more. If you don't see an item that you need on this website, just call us and we can get it for you.
