

1784-PCMK Communication Interface Card

(Catalog Number 1784-PCMK/B, -PCMK/S)

Use These Release Notes

Use these release notes with publication 1784-6.5.19, the PCMK Communication Card User Manual, published in February 1997.

New DH+™ Specifications - Link Baud Rate

Allen-Bradley has added 230k baud rate enhancements to the DH+™ binary.

Note this update to link baud rate in the DH+ memory map:

:0007h	Link Baud Rate	INI	FCh = 57600 FEh = 230400	R.....W	Host writes a valid value (PCMK baud rate) to byte :00007h. PCMK reads at start-up.
--------	----------------	-----	-----------------------------	---------	---

Important: Check the product documentation for your RSI communication software to see if the product supports 230k baud rate.

Updating the RSIPCMK Plug and Play Driver

All users should run the PCMKUPDT program before attempting to install an updated RSIPCMK driver. This is because the OEM version of Microsoft Windows has been updated and the changes will impact installation. The PCMKUPDT program is found on the same diskette as the RSIPCMK driver. Copy it to your hard drive and run the program from a MS-DOS prompt. After the PCMKUPDT program is run, install the driver, re-insert the PCMK card, and the system performs as if the card is new to the system.

The uninstall program within Windows will not clear up all of the necessary elements.
